

BOLUWATIFE OLAWUYI

Application Engineer

Lagos, Nigeria | +234 914 110 883 | Olawuyiboluwatife2@gmail.com | linkedin.com/in/olawuyi-boluwatife-3088632b8 | github.com/tifewalker

PROFESSIONAL SUMMARY

Application Engineer with 5+ years of experience designing and implementing business systems — CRM, call center platforms, and workflow automation — alongside full-stack web and mobile applications. Implemented Zoho CRM Plus (Desk, SalesIQ, Analytics) and HoduCC call center deployments for financial services clients, unifying fragmented, multi-channel support operations into single, automated systems with connected telephony. Currently leading development of KONECT Worksuite, a multi-module MERN-stack SaaS platform, while also delivering fintech, payments, and loan-processing systems end-to-end — comfortable owning a project from business requirements through implementation, integration, and delivery, solo or leading a small team.

TECHNICAL SKILLS

CRM & Business Systems: Zoho CRM Plus, Zoho Desk, Zoho SalesIQ, Zoho Analytics, Zoho Projects, Zoho Invoice, Guided Conversations (WhatsApp bot flows)

Call Center & Telephony: HoduCC, IVR Configuration, SIP/VoIP, Call Routing & Disposition Frameworks

Automation & Integration: Webhooks, REST APIs, GraphQL (basic), Socket.io (real-time), Third-Party System Integration

Full-Stack Development: React.js, Next.js, TypeScript, JavaScript (ES6+), Node.js, Express.js, MongoDB, Redis, Tailwind CSS, Zustand, Redux

Mobile: Flutter (Dart), Firebase

Testing & Quality: Jest, React Testing Library, Cypress (familiar), manual QA test-plan design (115+ test cases), regression testing

Systems & Infrastructure: Linux server administration, VMware/Hyper-V, Synology NAS & Veeam backup

CMS & E-Commerce: WordPress, Elementor, WooCommerce, Paystack integration

Tooling & Methodology: Git/GitHub, Vite, Webpack, Agile/Scrum

PROFESSIONAL EXPERIENCE

Application Engineer | Creastech Limited

Jan 2024 – Present

- Implemented Zoho CRM Plus for a Nigerian financial services company, unifying social media, WhatsApp, live chat, and email into one system — with automated departmental routing, webhook integrations, and a single cross-channel analytics dashboard replacing a fragmented, multi-app workflow.
- Configured Zoho CRM Plus alongside a full HoduCC call center deployment (including IVR) for a Nigerian microfinance bank, connecting call handling directly into the CRM so agents work from one system instead of switching tools.
- Lead development of KONECT Worksuite, a multi-module React/TypeScript SaaS platform (CRM, Help Desk, Live Chat, Email Campaigns, Projects, Invoicing, Analytics, AI chatbot) built for the Nigerian SME market.
- Built a full analytics dashboard, a dynamic permission-driven sidebar (role-based module access), and a visual workflow/flow builder (ReactFlow) using React, TypeScript, Tailwind CSS, and Zustand — enabling non-technical users to configure conversation flows with agent-handoff logic.
- Authored a formal QA test plan (115 test cases across 10 sheets) covering authentication, 2FA, and profile API surfaces, improving regression coverage ahead of release.
- Delivered 5+ additional React/Next.js client web applications, achieving ~40% faster load times through code splitting, lazy loading, and image optimization.
- Managed Linux servers and VMware/Hyper-V virtualization environments; provided Tier-2 application support for 50+ users.

Freelance Web & Systems Developer | Self-Employed (Walker-Tech)

Jun 2022 – Present

- Delivered 20+ custom WordPress and React-based websites for SMEs, all SEO-optimized and fully mobile-responsive.
- Integrated third-party APIs including payment gateways, analytics platforms, and CRM systems, improving client workflow efficiency by 30–70%.
- Provided ongoing maintenance, security patching, and performance tuning, maintaining 98% average uptime across client sites.

Web Designer & Blogger | A-Tech Solution

Jan 2022 – Jul 2022

- Designed and developed business-focused websites with on-page SEO optimization, increasing organic traffic by 45% within three months.
- Produced technical blog content and tutorials attracting 5,000+ monthly visitors.

Computer Instructor | Hoptec Services

Nov 2021 – Mar 2022

- Trained 200+ students on Microsoft Office Suite and IT fundamentals; 85% of students achieved proficiency certification.

CRM & CALL CENTER IMPLEMENTATIONS

A Nigerian Financial Services Company — Unified CRM & Support Automation

Zoho CRM Plus · Zoho Desk · SalesIQ · Zoho Analytics · Webhooks

- Unified social media, WhatsApp, live chat, and email into one Zoho CRM Plus system with automated departmental routing, webhook integrations with internal and third-party applications, and a single cross-channel analytics dashboard — replacing a workflow where agents worked across 4+ disconnected apps per customer.

A Nigerian Microfinance Bank — CRM & Call Center Integration

Zoho CRM Plus · HoduCC · IVR Configuration

- Implemented Zoho CRM Plus alongside a full HoduCC call center deployment, including IVR configuration, and connected the call center directly into CRM Plus so agents handle calls from within the same system instead of switching tools.

KEY PROJECTS

KONECT Worksuite — Multi-Module SaaS CRM Platform

React · TypeScript · Next.js · Node.js · Express · MongoDB · Redis · Socket.io · Zustand · Jest

- Leading development of a MERN-stack, multi-tenant SaaS suite (CRM, Help Desk, Live Chat, Email Campaigns, Projects, Invoicing, Workflows, Analytics, AI chatbot) targeting the Nigerian SME market, with a roadmap to expand across Africa and internationally.
- Built real-time features (notifications, live chat) with Socket.io and Redis pub/sub, and hardened auth/session logic (JWT, 2FA, role-based access control), fixing a privilege-escalation bug where module-admins could incorrectly gain super-admin rights.

SecureLoan — Loan Processing & Risk Management System

React · TypeScript · Node.js · Express · MongoDB · Flutter · Paystack · JWT

- Designed and built a full-stack loan and investment platform (web admin dashboard + Flutter borrower app) replacing manual, spreadsheet-based loan processing with rule-based approval workflows, borrower verification, and end-to-end lifecycle tracking from application through disbursement to repayment.
- Implemented automated credit-scoring logic, KYC document upload, and Paystack repayment collection processing 500+ monthly transactions; the companion Flutter app reduced default follow-up calls by ~35%.

XPay — Payment & Transaction Management System

React · Node.js · Express · MongoDB · Flutter · Webhooks · REST APIs

- Led development of XPay end-to-end — both the web platform and the Flutter mobile app — replacing fragmented, manual payment handling with real-time transaction tracking, automated validation workflows, and webhook-based integrations with internal business tools.

EDUCATION

BSc Software Engineering (In Progress) — MIVA Open University

2025 – Expected July 2027

HND Computer Science — Lagos State Polytechnic

2020 – 2023

Relevant coursework: Data Structures, Web Development, Database Management, Software Engineering

ADDITIONAL INFORMATION

Collaboration & Methodology: Experienced in Git workflows, code reviews, and Agile/Scrum methodologies; skilled at translating technical and business requirements between stakeholders and engineering teams.

Languages: English (Professional, fluent)

References: Available on request.
