ABOUT ME

As an experienced Application Engineer specializing in the MERN Stack, I excel in developing dynamic and scalable web applications. My proficiency extends to React development, graphic design, WordPress, and Microsoft technologies, enabling me to create visually appealing and functional solutions tailored to client needs. I am adept at utilizing Zoho CRM and automation tools to streamline business processes effectively. Additionally, I possess strong skills in Linux command-line operations on Ubuntu and Kali, server virtualization, PHP, SQL database management, and implementing recovery solutions, further enhancing my technical capabilities. I am passionate about leveraging cutting-edge technologies to drive innovation and deliver impactful results.
