BOLUWATIFE OLAWUYI

CRM & AI AUTOMATION ENGINEER | APPLICATION ENGINEER | BUSINESS SYSTEMS & INTEGRATION

Lagos, Nigeria
+234 9154 110 883 | Olawuyiboluwatife2@gmail.com
Portfolio | LinkedIn | GitHub

PROFESSIONAL SUMMARY

CRM and Application Engineer with over 5 years of experience implementing business applications, developing software solutions, integrating APIs and automating operational workflows. Experienced in the Zoho ecosystem, CRM implementation, customer support platforms, contact centre integrations, backend development and AI-powered automation.

Combines practical application engineering with an understanding of business processes, helping organisations translate operational requirements into reliable technology solutions. Hands-on experience configuring CRM systems, integrating communication channels, developing web and mobile applications, building automated workflows and connecting AI agents to business applications.

Has contributed to systems supporting approximately 10,000 monthly customer interactions, payment platforms with approximately 20,000 application users, and loan management solutions handling approximately 200,000 applications. Also founded and developed KONECT Worksuite, an integrated business platform incorporating CRM, customer support and AI-enabled automation.

Interested in CRM engineering, business systems implementation, application support, technical consulting, integrations and AI automation opportunities.

CORE COMPETENCIES

- **CRM & Business Applications:** Zoho CRM, Zoho CRM Plus, CRM implementation, configuration, administration, business process mapping and application support.
- **Workflow Automation:** Zoho workflows, Blueprint, Deluge, Zoho Flow, process automation, approval processes and business rules.
- **API & Systems Integration:** REST APIs, webhooks, third-party integrations, payment integrations, application connectivity and data exchange.
- **Customer Operations:** Customer support systems, omnichannel communication, contact centre integrations, IVR, ticketing, SLA workflows and customer engagement.
- **Application Engineering:** Backend development, frontend development, database design, application troubleshooting, testing and deployment.
- **AI & Automation:** AI agents, retrieval-augmented generation (RAG), embeddings, knowledge retrieval, tool/API integrations and human escalation workflows.
- **Technical Delivery:** Requirements gathering, solution configuration, documentation, UAT, user training, technical support and stakeholder collaboration.

PROFESSIONAL EXPERIENCE

CREASTECH LIMITED

Application Engineer | January 2024 – Present

- Implement, configure and support business applications across CRM, customer service, finance, communication and operational workflows.
- Work with the Zoho ecosystem, including Zoho CRM Plus, CRM, Desk, SalesIQ, Analytics, Projects, Invoice, Finance Plus and Books.
- Translate business requirements into application configurations, workflow automations, user permissions, reports and operational processes.
- Configure CRM workflows and business rules to improve how organisations manage customer records, enquiries, internal processes and service delivery.
- Develop and support API and webhook integrations between business applications and external platforms.
- Work on contact centre and communication solutions, including HoduSoft, HoduCC and IVR integrations.
- Troubleshoot application issues, investigate integration failures and support system improvements.
- Participate in requirements gathering, solution testing, user acceptance testing, technical documentation and end-user support.
- Collaborate with business stakeholders and users to ensure implemented solutions align with operational requirements.

WALKER-TECH

Freelance Web & Systems Developer | June 2022 – Present

- Develop and maintain web applications, business tools and backend services using JavaScript, TypeScript, React, Node.js and Express.
- Build REST API endpoints and backend functionality to support application workflows, data processing and third-party integrations.
- Develop responsive frontend interfaces and connect them to backend services and databases.
- Work with PostgreSQL, SQL and MongoDB for application data storage and management.
- Implement integrations, troubleshoot application issues and improve existing functionality.
- Handle development activities across requirements understanding, implementation, testing, debugging and deployment.

A-TECH SOLUTION

Web Designer & Blogger | January 2022 – July 2022

- Designed and maintained websites to support business online presence and communication.
- Created and managed website content, including blog articles and other digital materials.
- Supported website updates, content organisation and improvements to the overall user experience.

FREELANCE CLIENT ENGAGEMENTS

PREFERRED SOLUTIONS LLC

Freelance Business Systems & Process Automation Consultant

- Worked with the consulting business to identify operational processes that could benefit from digital solutions and automation.
- Translated business requirements into practical workflow improvements and technology-supported processes.
- Helped streamline repetitive administrative activities and improve information flow across business operations.
- Supported the use of digital tools to make routine business processes more organised and efficient.

JOMABEL HEALTHCARE FOUNDATION

Freelance Website Developer & Process Automation Consultant

- Designed and developed the organisation's website to communicate its mission, activities and programmes to a wider audience.
- Worked on digital process automation to improve internal workflows and reduce repetitive administrative activities.
- Translated organisational requirements into practical website and technology solutions.
- Supported website improvements and technical updates to maintain the organisation's digital presence.

SELECTED TECHNICAL PROJECTS

1. FINANCIAL SERVICES COMPANY — UNIFIED CRM & OMNICHANNEL CUSTOMER SUPPORT

Role: CRM Implementation & Integration Engineer

The organisation needed a more coordinated way to manage customer interactions across multiple communication channels and departments. I contributed to implementing and integrating a Zoho CRM Plus environment that brought customer engagement and support activities into a more unified workflow.

- Integrated **5 communication channels** into the customer engagement environment, including WhatsApp, social media, live chat and email.
- Configured Zoho CRM Plus applications to support **3 departments or teams**.
- Implemented automated routing and workflow processes to direct customer enquiries to the appropriate teams.
- Connected applications using REST APIs and webhooks and configured cross-channel reporting with Zoho Analytics.
- Supported an environment handling approximately **10,000 customer interactions per month**.
- Helped consolidate **5 previously separate applications** into a more unified customer management and support environment.

Technologies: Zoho CRM Plus, Zoho CRM, Zoho Desk, Zoho SalesIQ, Zoho Analytics, REST APIs, webhooks, WhatsApp and social channel integrations.

2. MICROFINANCE BANK — CRM & CONTACT CENTRE INTEGRATION

Role: Application Engineer / CRM Integration

The bank required closer integration between its customer relationship management and contact centre operations. I worked on connecting Zoho CRM Plus with HoduCC/HoduSoft and its IVR environment, enabling agents to manage customer interactions through a more connected workflow.

- Integrated the contact centre platform with Zoho CRM Plus, allowing agents to handle calls within a connected CRM workflow.

- Supported a contact centre environment with **10 agents across 10 call centre seats**.
- Integrated **5 IVR options or call flows** to support call navigation and routing.
- Worked on an environment handling approximately **1,000 calls**.
- Improved the connection between customer records and contact centre activity, giving agents better access to customer information during interactions.

Technologies: Zoho CRM Plus, HoduCC, HoduSoft, IVR, contact centre integration, APIs and workflow configuration.

3. XPAY — PAYMENT & TRANSACTION MANAGEMENT PLATFORM

Role: Full-Stack Developer

Contributed to the development of a payment and transaction management platform designed to provide users and merchants with a centralised way to manage payment activity. The project included development of the web platform and Flutter mobile application.

- Developed web and mobile application functionality supporting approximately **20,000 application users**.
- Built transaction management capabilities for an ecosystem serving approximately **2,000 users or merchants**.
- Implemented integrations with **3 payment providers or services**.
- Developed transaction status tracking for pending, successful and failed payments, alongside automated validation and webhook integrations.
- Built reporting and dashboard functionality to provide visibility into transaction volumes and payment statuses.
- Worked on a platform with an approximate transaction volume of **150,000**.

Technologies: Flutter, web application development, backend development, REST APIs, payment integrations, webhooks and database-backed transaction management.

4. KONECT WORKSUITE — MULTI-MODULE CRM & AI-ENABLED BUSINESS PLATFORM

Role: Founder | Full-Stack Engineer & AI Automation Engineer

Founded and developed KONECT Worksuite, an integrated business platform designed to bring customer management, support and operational tools into one environment. Led product development across frontend, backend, integrations, infrastructure and AI-powered customer engagement.

- Designed and developed **8 platform modules** covering CRM, Help Desk, Live Chat, Email Campaigns, Social Engagement, Projects, Invoicing, Workflows and Analytics.
- Built the frontend using React and TypeScript, with a Node.js and Express backend and MongoDB for data management.
- Implemented Redis and BullMQ for background processing, Socket.io for real-time communication, and REST APIs and webhooks for system integrations.
- Deployed and managed application infrastructure using AWS, Docker, Linux and Nginx.
- Developed an AI agent architecture using Ollama, Qwen and Nomic Embeddings, incorporating retrieval-augmented generation (RAG) to ground responses in relevant knowledge.
- Connected the AI agent to business APIs and communication workflows to support customer conversations across **5 connected channels**.
- Implemented human escalation workflows for conversations requiring staff attention.
- Developed and tested the production AI workflow, which has handled **15 real customer conversations**.

Technologies: React, TypeScript, Node.js, Express, MongoDB, Redis, BullMQ, Socket.io, REST APIs, webhooks, AWS, Docker, Linux, Nginx, Ollama, Qwen, Nomic Embeddings and RAG.

5. SECURELOAN — LOAN PROCESSING & RISK MANAGEMENT PLATFORM

Role: Full-Stack Developer

Developed a loan management application designed to centralise loan processing and reduce reliance on disconnected manual processes such as spreadsheets and email. The solution supported the loan lifecycle, from application submission through approval, disbursement and repayment tracking.

- Developed a centralised loan management platform supporting approximately **200,000 loan applications**.
- Built workflows covering **5 stages or approval levels** to structure the loan processing lifecycle.
- Developed functionality for borrower records, application management, verification, approval workflows and repayment tracking.
- Implemented dashboards and reporting features to provide visibility into loan volumes, application statuses and risk indicators.
- Built the frontend and backend using React, TypeScript, Node.js and MongoDB, with Paystack integration and REST APIs.
- Delivered a system designed to support approximately **1,000 users** and provide a more structured approach to loan processing and monitoring.

Technologies: React, TypeScript, Node.js, MongoDB, REST APIs, Paystack and workflow automation.

TECHNICAL SKILLS

CRM & Business Applications

Zoho CRM, Zoho CRM Plus, Zoho Desk, Zoho SalesIQ, Zoho Analytics, Zoho Campaigns, Zoho Projects, Zoho Invoice, Zoho Finance Plus, Zoho Books, CRM configuration, workflow automation, Blueprint, Deluge, Zoho Flow and business process implementation.

Programming & Application Development

JavaScript, TypeScript, React, Node.js, Express.js, HTML, CSS, backend development, frontend development and responsive web applications.

AI & Automation

AI agents, retrieval-augmented generation (RAG), embeddings, Ollama, Qwen, Nomic Embeddings, knowledge retrieval, API-connected agents and human escalation workflows.

APIs & Integrations

REST APIs, webhooks, third-party integrations, GraphQL fundamentals, Socket.io, payment integrations and application connectivity.

Databases & Processing

PostgreSQL, SQL, MongoDB, Redis, BullMQ and database-backed application development.

Cloud, Infrastructure & Deployment

AWS, Docker, Linux, Nginx, Git, GitHub, VMware, Hyper-V, Synology, Veeam, application deployment and troubleshooting.

Testing & Technical Delivery

Requirements gathering, system configuration, UAT, functional testing, regression testing, debugging, documentation, user support and deployment.

Customer & Marketing Technology

HoduSoft, HoduCC, IVR, customer support platforms, WhatsApp integrations, email campaigns, audience segmentation, Google Ads and Meta Ads.

EDUCATION

MIVA OPEN UNIVERSITY

B.Sc. Software Engineering | 2025 – April 2027 (Expected)

LAGOS STATE POLYTECHNIC

Higher National Diploma (HND), Computer Science | 2020 – 2023
