PROFESSIONAL SUMMARY

Frontend-focused Full-Stack Developer with 5+ years building responsive, high-performing web applications with React, Next.js, and TypeScript across fintech, retail, healthcare, and education. Skilled at translating UI/UX designs into reusable, scalable components, consuming REST and GraphQL APIs, and collaborating with backend, QA, and product teams in Agile/Scrum environments. Currently leading frontend development of KONECT Worksuite, a multi-module MERN-stack SaaS CRM platform (CRM, Help Desk, Live Chat, Analytics, Projects, Invoicing) including a visual flow-builder, permission-driven navigation, and role-based dashboards. Comfortable writing unit tests with Jest and building structured QA test plans to drive regression coverage. Actively seeking frontend/MERN engineering opportunities.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, shadcn/ui, Redux, Zustand, Context API

Testing & Quality: Jest, React Testing Library (working knowledge), TDD principles, Cypress (familiar), manual test-plan design & execution (115+ test cases), regression testing

API Integration: RESTful APIs, GraphQL (basic), Socket.io (real-time), Webhooks

Backend & Databases: Node.js, Express.js, MongoDB, Redis, PHP, MySQL, Firebase Firestore

Mobile: Flutter (Dart), Firebase

Tooling & Architecture: Git/GitHub, Vite, Webpack, Responsive Web Design, Agile/Scrum, CI-friendly workflows

CMS & E-Commerce: WordPress, Elementor, WooCommerce, Paystack Integration

CRM & Business Tools: Zoho CRM, Zoho Desk, Zoho Projects, Zoho Analytics, Zoho Invoice

PROFESSIONAL EXPERIENCE

Application Engineer / Frontend Developer | Creastech Limited *Jan 2024 – Present*

- Lead development of **KONECT Worksuite**, a multi-module React/TypeScript SaaS platform (CRM, Help Desk, Live Chat, Email Campaigns, Projects, Invoicing, Analytics, AI chatbot) built for the Nigerian SME market.
- Built a full analytics dashboard and a dynamic, permission-driven sidebar (role-based moduleAccess) using React, TypeScript, Tailwind CSS, shadcn/ui, and Zustand for state management.
- Designed a visual workflow/flow builder for the live-chat/bot module using ReactFlow, enabling non-technical users to configure conversation flows with agent-handoff logic.
- Authored a formal QA test plan (115 test cases across 10 sheets) and expanded coverage to authentication, 2FA, and profile API surfaces, improving regression coverage ahead of release.
- Diagnosed and fixed critical frontend state bugs, including shared modal draft state that let unverified data persist on screen after a user abandoned a verification step in a fintech withdrawal flow.
- Consumed and integrated REST APIs across CRM modules, collaborating with backend, QA, and product stakeholders through sprint planning, stand-ups, and code review in an Agile/Scrum workflow.
- Delivered 5+ additional React/Next.js client web applications, achieving ~40% faster load times through code splitting, lazy loading, and image optimization.
- Configured Zoho CRM Plus (Guided Conversations bot flows, Zoho Desk ticket workflows, SLA policies) and automated CRM workflows, cutting manual data-entry tasks by 40%.
- Managed Linux servers and VMware/Hyper-V virtualization environments; provided Tier-2 application support for 50+ users.

Freelance WordPress & Frontend Developer | Self-Employed *Jun 2022 – Present*

- Delivered 20+ custom WordPress and React-based websites for SMEs, all SEO-optimized and fully mobile-responsive.
- Integrated third-party APIs including payment gateways, analytics platforms, and CRM systems, improving client workflow efficiency by 30–70%.
- Provided ongoing maintenance, security patching, and performance tuning, maintaining 98% average uptime across client sites.

Web Designer & Blogger | A-Tech Solution *Jan 2022 – Jul 2022*

- Designed and developed business-focused websites with on-page SEO optimization, increasing organic traffic by 45% within three months.
- Produced technical blog content and tutorials attracting 5,000+ monthly visitors.

Computer Instructor | Hoptec Services *Nov 2021 – Mar 2022*

- Trained 200+ students on Microsoft Office Suite and IT fundamentals; 85% of students achieved proficiency certification.

KEY PROJECTS

KONECT Worksuite — Multi-Module SaaS CRM Platform — *React, TypeScript, Next.js, Node.js, Express, MongoDB, Redis, Socket.io, Zustand, Jest*

- Architecting and building a MERN-stack, multi-tenant SaaS suite (CRM, Help Desk, Live Chat, Email Campaigns, Projects, Invoicing, Workflows, Analytics, AI chatbot) targeting Nigerian SMEs.
- Built a full analytics dashboard mapped to real API response shapes and a dynamic sidebar driven by role-based moduleAccess permissions.
- Implemented a visual flow builder (ReactFlow) for the live-chat/bot module, letting non-developers design conversation flows with agent-handoff logic.
- Built real-time features (notifications, live chat) with Socket.io and Redis pub/sub, plus a Redis cache-versioning strategy to keep permission data consistent across deploys.
- Wrote unit tests (Jest) for critical UI components and authored a 115-case manual QA test plan across 10 sheets, later expanded to cover OAuth, 2FA, and profile endpoints reducing regressions before release.
- Hardened auth/session logic (JWT with org-scoped payloads, 2FA, role-based access control) and fixed a privilege-escalation bug where module-admins could incorrectly gain super-admin rights.

Fintech Loan & Investment Platform — *React, TypeScript, Node.js, Express, MongoDB, Flutter, REST APIs, JWT*

- Architected and developed a full-stack fintech solution (web + mobile) enabling a financial services company to manage personal loan disbursements and investment portfolios from a single platform.
- Built a React/TypeScript admin dashboard with role-based access control for loan officers, investors, and superadmins, supporting real-time portfolio tracking and investment return calculations.
- Developed a companion Flutter mobile app allowing borrowers to apply for loans, track repayment schedules, and receive push-notification reminders, reducing default follow-up calls by ~35%.
- Implemented automated credit-scoring logic, KYC document upload (with cloud storage), and Paystack payment integration for repayment collection processing 500+ monthly transactions.
- Secured all endpoints with JWT authentication, input validation, and rate limiting, achieving zero critical security incidents in production.

Student Wallet Mobile App — *Flutter, Firebase, REST APIs, QR Scanner*

- Built a cashless payment solution for schools, eliminating cash-handling issues in cafeterias and school stores.
- Features include remote parental wallet top-up, QR code point-of-sale scanning, and real-time transaction history; reduced transaction processing time by 70% versus traditional cash.

Loan Management Dashboard — *React, TypeScript, Node.js, Express, MongoDB*

- Delivered an admin dashboard tracking 200+ loan applications with role-based access control, automated email notifications, and status tracking, cutting loan processing time by 35%.

E-Commerce Web Solutions — *WordPress, WooCommerce, React, Paystack*

- Developed 5+ e-commerce platforms with secure Paystack payment integration, inventory management, and order tracking, processing 1,000+ monthly transactions.

EDUCATION

BSc Software Engineering (In Progress) | MIVA Open University | 2025 – Expected July 2027

HND Computer Science | Lagos State Polytechnic | 2020 – 2023

Relevant: Data Structures, Web Development, Database Management, Software Engineering

ADDITIONAL INFORMATION

Collaboration & Methodology: Experienced in Git workflows, code reviews, and Agile/Scrum methodologies. Skilled at translating technical requirements for non-technical stakeholders.

Languages: English (Professional – fluent)

References: Available on request.
